EDUCATION

EPFL, Swiss Federal Institute of Technology, Lausanne

Sep. 2026 – Present

MSc in Robotics

EPFL, Swiss Federal Institute of Technology, Lausanne

Sep. 2023 – July 2026

BSc in Life Sciences Engineering

RELEVANT COURSEWORK

Programming: Object Oriented Programming (Grade: **5.0**), Applied Software Engineering (Grade: **5.75**), Biological Data Science I & II (Grade: **4.75** & **5.75**)

Electronic & Signal Processing: Electrical Systems and Electronics I & II (Grade: **5.75** & **5.25**), Signals and Systems I & II (Grade: **5.0** & **4.5**)

Mechanics: Structural Mechanics (Grade: **5.75**)

Ongoing: Basics of mobile robotics, Legged robots, Machine Learning, Model predictive Control

ACADEMIC PROJECTS

Mouse Behavior Prediction Model

Sep. 2025 – Dec. 2025

Machine Learning Course

- Built machine learning models to predict stimuli and behavioral responses from neural activity recordings
- Evaluated linear and non-linear models (ridge regression, random forests and gradient boosting) with cross-validation

Simulation of the strength of materials subjected to stress

Sep. 2025 – Dec. 2025

Structural Mechanics Course

- Implemented a calculation algorithm to determine the point at which materials broke when subjected to stress.
- Summarized my project in a LaTeX report, explaining the structure of the code and the physical assumptions used.

Bachelor's Thesis – Mouse Learning Model

Jul. 2025 – Aug. 2025

Brain Mind Institute, Laboratory of Sensory Processing, EPFL

- Evaluated model performance to better understand its limits
- Implemented new algorithms and features to better capture behavioral adaptation
- Grade: **6.0/6.0**

Hopfield Neural Network Simulation

Sep. 2024 – Dec. 2024

Applied Software Engineering Course

- Implemented a Hopfield neural network to simulate associative memory retrieval from perturbed patterns
- Simulated synchronous and asynchronous network dynamics to analyze convergence behavior

Simulation of Mouse Population Dynamics

Feb. 2024 – May 2024

Object Oriented Programming Course

- Agent-based simulation of a mouse habitat
- Modeling of mouse life cycle and disease spread

PROFESSIONAL EXPERIENCE

N-Pulse

Sep. 2026 – Present

Firmware Engineer

Junior Enterprise EPFL

Sep. 2025 – July 2026

Project Manager

- Manage projects from client needs assessment to final delivery
- Coordinate and support one student consultant throughout the mission
- Ensure clear communication, project quality, and client satisfaction

Le Petit Frigo, local vegetable farm

Sep. 2023 – Present

Founder of a vegetable box subscription system

- System set up, website design, advertisement on social media and flyer design
- Over 10k in revenue and 450 boxes sold

Pictet & Cie SA

Aug. 2024

IT infrastructure support assistant

Private Tutor

Sep. 2022 – Present

Math and biochemistry tutor for high school students

LANGUAGES

English : C1

German : B1

French : Native

INTERESTS

Technology : FPV drone (welding, building and pilot), 3D printing, CAD

Piano: Composition (piano score writing) and improvisation

Sport: Basketball (10 years at Red Devils club in Morges, including 2 years as team captain), Skiing and Running
